<b>Contents</b>		
<p>Looking at different approaches to teaching religious education, the section on religious education discusses key problems in the subject in a multicultural and multireligious context. The section on pastoral theology reflects upon the process of an individual's becoming a Christian and the way it impacts upon his/her biography; a particular focus is on the influence of the milieu in which an individual lives. The section on social ethics discusses human behaviour and the dimensions of socio-ethical education. The individual module components all share the theme of exploring aspects relating to the process of becoming and being a Christian.</p>		
<b>Intended learning outcomes</b>		
<p>At the end of the course, students will have learned to think of being a Christian as a multidimensional process. They will have gained deeper insights into the religious development of individuals and will be able to interrelate it with the contemporary cultural and social environment. They will have become familiar with approaches to supporting the processes individuals are undergoing in their religious development, processes that expose individuals to the richness of Christian tradition, warrant freedom and individuality, and view the social context as a welcome challenge.</p>
