Machine Ethics		o2-DigLo2-222-mo1
Module coordinator		Module offered by
Chair of Criminal Law, Criminal Procedure, Legal Theory, Information Law and Legal Informatics		Faculty of Law
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
The students will discuss the major ethical issues concerning the use of artificial intelligence, particularly the development towards the implementation of moral decision-making in artificial systems.		
Intended learning outcomes		
The students have dealt with the fundamental ethical questions arising due to the use of artificial intelligence. They have reflected on the limits that may be imposed on the further development of artificial systems from a moral-ethical point of view, which is essential for the legal assessment of permissibility.		
Courses (type, number of weekly contact hours, language – if other than German)		
V (2) Module taught in: English		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
a) written examination (90 minutes) or b) oral examination (approx. 15 minutes) Language of assessment: English		
Allocation of places
