Module title | Structural Biology
---|---
Abbreviation | 03-5S2ST-BC-152-m01

Module coordinator | header of the Chair of Structural Biology
Module offered by | Faculty of Medicine

ECTS | 10
Method of grading | only after succ. compl. of module(s)
numerical grade | --

Duration | 1 semester
Module level | undergraduate
Other prerequisites | --

Contents
This module provides a brief introduction to crystallography and commonly used biophysical techniques as well as the fundamental principles of macromolecular architectures. Building on this, the structure and function of selected biological macromolecules are presented. In small groups, participants will analyse one specific macromolecule in silico with respect to its structure and biological function and will present their results in a talk. The various macromolecules in their entirety reflect a number of important biological problems.

Intended learning outcomes
On the basis of individually assigned model proteins, the students will acquire the ability to explore common problems in structural biology and to analyse structure-function relationships. They will also acquire skills in the oral presentation of scientific results as well as in the in silico analysis of biological macromolecules.

Courses (type, number of weekly contact hours, language — if other than German)
V (2) + Ü (6)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)
written examination (approx. 60 minutes)
Language of assessment: German and/or English

Allocation of places
