Module title: Advanced Biochemistry and Molecular Biology
Abbreviation: 03-98-BCHF-152-m01

Module coordinator: holders of the Chairs of Physiological Chemistry, Developmental Biochemistry, Biochemistry and Molecular Biology
Module offered by: Faculty of Medicine

ECTS: 10
Method of grading: Only after succ. compl. of module(s)
Numerical grade: --
Duration: 1 semester
Module level: undergraduate
Other prerequisites: Admission prerequisite to assessment: presentations.

Contents:
Enhanced insight into functional biochemical and molecular biological relationships. Examples of the molecular control of cell and organ functions. Application of molecular biology and genetic engineering methods to investigate cellular parameters such as gene expression patterns, protein expression or growth and apoptosis. Review of current literature on selected topics.

Intended learning outcomes:
Students gain an advanced knowledge of functional biochemistry and molecular biology. They develop an understanding of the driving forces of normal and misguided cell functions and acquire practical routine in circumscribed experiments. Students gain an insight into the critical interpretation of experimental data.

Courses:
V (4) + S (1) + Ü (6)
Module taught in: German and/or English

Method of assessment:
written examination (60 to 90 minutes).
If announced by the lecturer at the beginning of the course, the written examination may be replaced by an oral examination of one candidate each (20 to 30 minutes) or an oral examination in groups of up to 3 candidates (approx. 20 minutes per candidate).
creditable for bonus

Allocation of places:
--

Additional information:
--

Referred to in LPO I (examination regulations for teaching-degree programmes):
--

Module appears in:
Bachelor' degree (1 major) Biomedicine (2015)
Bachelor' degree (1 major) Biomedicine (2018)
