<b>Contents</b>		
Students present selected primary publications written in English and discuss their contents, methods and results in the group.		
<b>Intended learning outcomes</b>		
Students learn the structure of scientific articles and the appropriate approaches to answer a specific question. They possess the ability to read scientific articles critically, to extract relevant information for a presentation, to evaluate results and face them to critical discussion in the group regarding their interpretation. They develop the ability to place the contents of an article in the broader context of a specific subject area, also in relation to clinically relevant aspects.
