| Master Thesis Biomedicine | | 03-98-MTH-152-m01 |
| Module coordinator | | Module offered by |
| Dean of Studies Biomedizin (Biomedicine) | | Faculty of Medicine |
| ECTS | Method of grading | Only after succ. compl. of module(s) |
| 25 | numerical grade | -- |
| Duration | Module level | Other prerequisites |
| 1 semester | graduate | -- |
| Contents | | |
| Students conduct a scientific research project using appropriate methods and adhering to the principles of good scientific practice within six months. They document and discuss their work in a thesis. | | |
| Intended learning outcomes | | |
| The students are qualified to apply acquired experimental and scientific competences to a concrete, current scientific problem and to carry out experiments according to the rules of good scientific practice. They are able to independently acquire the current state of science on a specific issue in order to derive ideas for a project to be worked on. They have the ability to formulate goals of a biomedical project and to develop solution strategies in a team. They are competent to document their work, to present it in a written thesis according to a scientific publication style and to interpret it in a larger context. | | |
| Courses (type, number of weekly contact hours, language – if other than German) | | |
| No courses assigned to module Module taught in: German / English | | |
| Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus) | | |
| Master's thesis (approx. 30 to 60 pages) Language of assessment: English | | |
| Allocation of places | | |
