### Duration
1 semester

### Module level
undergraduate

### Other prerequisites
--

### Contents
Fundamental and specific knowledge about biomaterials out of metals, ceramics and polymers with surface modification and characterisation. Fabrication as well as examples for application will be addressed. Modern approaches in biomaterial research including hydrogels, additive manufacturing, 3D cell scaffolds and materials for tissue engineering will also be discussed.

### Intended learning outcomes
Students have developed a deep knowledge in the field of biomaterials, their use in clinics as well as methods for biomaterial fabrication.

### Courses
(type, number of weekly contact hours, language — if other than German)

V (4) + P (2)

### Method of assessment
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) assessment and b) Vortestate/Nachtestate (pre and post-experiment examination talks approx. 15 minutes each, log approx. 5 to 10 pages each) and assessment of practical assignments (2 to 4 random examinations) Assessment offered: Once a year, summer semester
Language of assessment: German and/or English creditable for bonus

### Allocation of places
--

### Additional information
--

### Referred to in LPO I
(examination regulations for teaching-degree programmes)

--

### Module appears in
Bachelor' degree (1 major) Functional Materials (2015)
