

Module title		Abbreviation
Practical training I		03-KFE-08-152-m01
Module coordinator		Module offered by
Institute of Clinical Epidemiology and Biometry (ICE-B)		Faculty of Medicine
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>Four-week practical training in a clinical or epidemiological research unit; written summary of research topics the participant was involved in, of experiences and newly acquired knowledge and skills, and critical reflection of the practical training; regular attendance of the colloquium and contribution to the discussion; presentation of the participant's own practical training in a talk.</p>		
Intended learning outcomes		
<p>The students acquire practical experience in all domains of the real world of studies. This includes preparation of studies and study documents, data acquisition (including examination of study participants), data management, data checks, study logistics etc. In the summary report, students relate their newly acquired experience to the theoretical matter studied so far and learn about the practical meaning of theoretical issues. The colloquium talk provides students with an opportunity to review what they have learned in the practical course. During the talk and discussion with their classmates, students will be able to practise their communication skills. The presentation of the individual topics will provide all participants with more in-depth insights into the real world of studies.</p>		
Courses (type, number of weekly contact hours, language – if other than German)		
P (7) + K (3)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
oral examination of one candidate each (approx. 45 minutes) creditable for bonus		
Allocation of places
