Faculty of Medicine

ECTS

15

Method of grading

Only after succ. compl. of module(s)

(1) successfully completed

Duration

2 semester

Module level

graduate

Other prerequisites

--

Contents

Using scientifically tested and recognized psychotherapeutic procedures and methods, the students are involved in the diagnostics and treatment of patients: 1. Initial conversations, anamneses, psychodiagnostic examinations, assessing indications, as well as implementing patient information on these points on at least seven patients of different ages and with various disorders, 2. being actively involved in at least two further individual psychotherapeutic patient treatments (at least one of them in children and/or adolescents), 3. conduct and document discussions with reference persons in at least four patient treatments, 4. participation in at least twelve group psychotherapeutic sessions, and 5. taking part in further educational courses within the host institution.

Intended learning outcomes

In university outpatient clinics, facilities for psychotherapeutic, psychiatric, psychosomatic, neuropsychological care or in interdisciplinary treatment centers with a focus on psychotherapy, students are enabled to apply the knowledge they have acquired in real treatment settings and in direct contact with patients. During their studies, students will be involved by psychotherapists in inpatient or semi-inpatient care using scientifically tested and recognized psychotherapeutic procedures and methods participate in the diagnosis and treatment of patients.
