### Module title

Tissue Engineering - Basics for Tissue Regeneration

### Abbreviation

03-TE-REG-161-m01

### Module coordinator

unknown

### Module offered by

Faculty of Medicine

### ECTS

5

### Method of grading

numerical grade

### Only after succ. compl. of module(s)

--

### Duration

1 semester

### Module level

undergraduate

### Other prerequisites

--

### Contents

### Intended learning outcomes

Students gain fundamental knowledge occurring in the transplantation of non-autologous cells, the selection of stem cells for the cartilage and bone regeneration and materials which can be used as diagnostics and for therapeutic approaches.

### Courses

(type, number of weekly contact hours, language — if other than German)

V (2) + Ü (2)

### Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) report on practical course (approx. 10 pages) and b) presentation (approx. 30 minutes) or written examination (approx. 60 minutes)

Language of assessment: German and/or English

### Allocation of places

--

### Additional information

--

### Referred to in LPO I

(examination regulations for teaching-degree programmes)

--

### Module appears in

Master’s degree (1 major) Functional Materials (2016)
