Contents		
<p>Students will get a theoretical introduction and amplification of how to write a scientific Grant application. The following topics will be discussed: Planing of a scientific project, Data production, Data evaluation, , scientific writing, reading literature. Using student former lab rotations a “dummy”-Grant Application is written, by each student and learned content is recessed.</p>		
Intended learning outcomes		
<p>Students who successfully completed this module are able to remind and understand important aspects of how to invent a scientific project and how to write a grand application. Furthermore, students are able to classify important aspects in terms of preparing, planning and structuring a scientific project. Based on current knowledge and experimental data evaluation, students are able to critical read and evaluate current publications in neurobiology as well as extract relevant information from recent publications.</p>
