Contents		
This module focuses on consolidating students' knowledge of regional history and giving students an opportunity to independently apply this knowledge, employ the methods of the discipline, and use relevant forms of presentation. Discussing selected examples, the module consolidates students' previous knowledge of regional history. Problems in regional history are explored in both source-based and research-oriented courses. A particular focus is on digital research in regional history (databases, editions, digital cartography, simulations).		
Intended learning outcomes		
Students are able to familiarise themselves with more complex issues, employing the methods of the discipline and taking into account relevant source material and secondary literature as well as the findings of related disciplines. They are able to independently analyse and interpret sources and accounts of regional history. They are able to record, interpret, and present their findings, using modern software.
