<b>Contents</b>		
<p>One of the following sub-modules has to be chosen. The sub-module argumentation and verbalisation concerns the practice of writing: How do I mount an argument? How far does a smart wording distinguish from an awkward one? When does a sentence is not only correct, but also nice and smart? What do you need to know if the intelligibility of a text should be ensured? How does a text receives argumentative density and rhetorical subtlety? The writing will exemplarily be practised on subjects that are relevant to the discipline, for example: How a recension about a subject book is written, how is the discussion of an evening of theatre or a literary novelty is written?; The sub-module recension comprises the practise of the text genre of recension by well-chosen literary texts (generally from authors of today) or by readings (depending on offers). The basis module information literacy, which focuses on information literacy in an academic context, is aimed at students of the humanities. This includes research strategies and tools, dealing with electronical information tools of the library, specific sources of information in the humanities: bibliographies, databases, catalogues, magazines, reference work, internet research and search engines, overview of information tools and literature administration, which students will use during their studies.</p>		
<b>Intended learning outcomes</b>		
<p>Concerning the sub-module argumentation and formulation: Students have the ability to formulate and argue as well as the ability to structure texts; Additionally, they will acquire stylistic, argumentative and structural basic principles of important text and linguistic levels. Concerning the sub-module recension: Students have worked on generic insights into modern literature and have learned how to deal with the text type "recension". Concerning the sub-module information competence to the humanities: Students know which information will be needed for certain purposes. They have the ability to find and evaluate information that are important to their discipline and, additionally, find relevant information in various sources. At the same time, they are particularly familiar with the different qualities of specific information sources (databases) with a limited access and generally accessible information (internet). Moreover, students are able to review, administrate and process the researched information for their individual needs with the help of literature administration programmes and e-learning applications. This module is designed to teach students how to find and deal with the necessary information and literature research for the thesis.</p>
