Next to theory and practice references, students will acquire current empirical findings of the teaching and learning research in particular and apply these findings to contents of a German class in a subject-didactic contouring. For this, they acquire on the basis of current research literature the required knowledge, which they will present during the course in an appropriately way and dialogically interview about possibilities to affiliate the subject teaching. This acquisition, mediation, presentation and evaluation of contents have to be seen as extension of the self-competence considering the technical contents.
