Contents		
Object of the module will be the independent and guiding reading matter of generic texts of modern German history of literature in order to prepare students for the state examination. Moreover, respective state examination issues will be elaborated in a sample test collectively or independently.		
Intended learning outcomes		
Due to their own reading matter and generic commentation of relevant exam texts, students possess the ability to deal with complex objects of a discipline under examination conditions in a linguistic form and in a methodically adequate way. Due to the independent associated reading matter of important authors and texts as well as the in-depth analysis of literary genres, motives and the cultural history in general, students will acquire the skill to extend the already acquired work techniques to all aspects and areas of the discipline independently.
