| <p>The module gives a basic insight into the research of everyday and popular cultures from the view of European Ethnology/ Cultural Anthropology (empirical cultural science, Cultural Anthropology). For a long time, it has only been the "nice things" of the former "cultures" that had to be saved, but for a modern Cultural Anthropology, the testimonies of everyday and popular mass culture are of great significance: The dramatic changes of the pre-industrial world changing into an industrial and post-industrial world are visible. This changed research concept of the cultural analysis, the most important technical terms, sources, methods as well as selected working areas and technical relevant basics of the scientific work covers an overall introduction to the research field culture. The acquired basics will be consolidated and differentiated on the basis of a generic topic area. Thus, the study of specific everyday and popular cultures in history and the present age takes place, taking into account the regional, particularly the dealing with Bavarian regions, but also cultural and intercultural environment issues. Hence, the module provides a detailed background knowledge of the field of experience of pupils and students that can be applied to the school practice at the same time.</p> | | |
