Contents		
<p>In European Ethnology, spaces are viewed, among other things, as results of the practices of various actors. They are also seen in European ethnological cultural analysis as fields of action that have been produced in each case as well as repeatedly renewed and which in turn shape and enable society in a variety of ways. The making, design and change of urban or rural spaces are of equal interest just as regional or local spaces to include co-designing or designed entities. A focus of this module is the cultural analysis of numerous spaces as made by actors and viewed from a past, present and future perspective.</p>
