<b>Contents</b>		
<p>The module covers phenomena of popular music in a global context. The contents focus on the reception of non-European music in Europe and North America as well as the analysis of non-European musicians with Western popular music, the resulting cooperations and syntheses. Aesthetic, commercial and media-technical aspects are taken into account. Music as an anthropological phenomenon is a primary criterion in the construction of cultural identities. At the same time it proves to be a carrier of intercultural transfer processes. The module develops central theoretical principles of cultural transfer research in an exemplary manner.</p>		
<b>Intended learning outcomes</b>		
<p>The student acquires intercultural competences. He/she is qualified to theoretically identify general discourses between music cultures and specific intercultural reception and assimilation mechanisms, e.g. specific manifestations of a "Global Pop", and to provide them by using examples.</p>
