Contents
The advanced module consolidates the basics that have already been acquired in the basic module. Hence, at least one subject area has to be covered in-depth and with emphasis in the introductory course, e.g. didactics and methodology of the communicative English lessons, intercultural learning or theories of learning languages. Students will be able to design and evaluate appropriate learning environments, to critically reflect the role of the teachers and students and to combine learning materials, methods and technologies effectively. Additionally, they are able to analyse individual learning progresses and incentive measures, to evaluate foreign language educational particularities of different learning contexts and to prepare and apply literary, textual, cultural and media-educational processes. The course does not necessarily cover contents of the core curriculum, but can also include newer research results of the English teaching methodology and its reference disciplines. The course is an optimal preparation for the written exam, which is also based on the core curriculum.

Intended learning outcomes
Students
- acquire consolidated knowledge of covered areas of the methodology of English teaching
- understand and reflect respective technical literature independently
- broaden their subject-specific repertoire of concepts.
