Module title  | Abbreviation
--- | ---
Land and Water Management | 04-GEO-APP2-162-m01

Module coordinator
holder of the Professorship of Remote Sensing

Module offered by
Institute of Geography and Geology

ECTS | Method of grading | Only after succ. compl. of module(s)
--- | --- | ---
5 | numerical grade | --

Duration | Module level | Other prerequisites
--- | --- | ---
1 semester | graduate | --

Contents
A general introduction on the land and water management and its demand for integrative knowledge in numerous fields of environmental and social sciences is given. The students select topics in which remote sensing and geoanalysis can significantly contribute parameters for answering relevant management questions. The topics include the derivation and use of parameters for monitoring land and/or water resources and examples how to use them in analytical or predictive models, or in indicator systems.

Intended learning outcomes
Participants will increase their knowledge about remote sensing approaches and geoanalytical methods which support different fields of land and water management. The students will gain practical experiences in selected examples.

Courses
(type, number of weekly contact hours, language — if other than German)
S (1) + Ü (1)
Module taught in: English

Method of assessment
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)
a) presentation (approx. 30 minutes) or b) preparing a poster (approx. 10 hours total) or c) term paper (approx. 15 pages)
Assessment offered: Once a year, summer semester
Language of assessment: English or German (assessment will be held in English; in addition, the examiner may, where possible, decide to hold assessment in German)
creditable for bonus

Allocation of places

Additional information

Referred to in LPO I
(examination regulations for teaching-degree programmes)
