Contents

In the seminar, students practise working with different research approaches, groups of sources, and controversial interpretations, investigating selected topics that were covered in the lecture(s). The exercise gives students an opportunity to consolidate, under expert guidance, the skills they have developed in the seminar. This research module always aims to equip students with the skills and methods they are likely to need for their theses.

Intended learning outcomes

The research module comprises a lecture, an exercise, and a seminar. Students develop the knowledge and skills they need to independently investigate historical problems. They reflect on the use of historical sources and practise working with these, drawing on the knowledge and skills they have acquired in the area of historical auxiliary sciences. In addition, they practise solving methodological and theoretical problems in history. Participation in this module also activates the language skills that are needed for historical research.
