**Contents**

Introduction to "basic geological processes of the Earth"; Introduction to the basics of an interdisciplinary collaboration between the "Classical Studies" and "Natural Sciences".

**Intended learning outcomes**

Students dispose over basics of the development and structure of the Earth, development and composition of minerals and rocks (also as essential material of archaeological findings) as well as processes of plate tectonics that characterised former habitats significantly. Moreover, students have acquired the basics of interdisciplinary collaboration between ancient civilisation studies and natural sciences in the archaeometry, particular concerning an analytical orientated archaeometry; they are familiar with essential analysis and dating methods.

**Courses**

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- 04-Geo-Arch1-1-082: V + T (no information on SWS (weekly contact hours) and course language available)
- 04-Geo-Arch1-2-082: A (no information on SWS (weekly contact hours) and course language available)

**Method of assessment**

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

**Assessment in module component 04-Geo-Arch1-1-082: Introduction to physical geography 1: physical geology**

- 5 ECTS, Method of grading: numerical grade
- written examination (45 minutes)
- Other prerequisites: A basic knowledge of inorganic chemistry and physics is recommended.

**Assessment in module component 04-Geo-Arch1-2-082: Introduction to archaeometry**

- 5 ECTS, Method of grading: numerical grade
- written examination (30 minutes) or oral examination (30 minutes)
- Other prerequisites: A basic knowledge of inorganic chemistry and physics is recommended.

**Allocation of places**
