# Mineral exploration methods

**Module title**

Mineral exploration methods

**Abbreviation**

04-Geo-MLG2-152-m01

**Module coordinator**

holder of the Professorship of Geodynamics and Geomaterials Research

**Module offered by**

Institute of Geography and Geology

**Duration**

1 semester

**Module level**

graduate

**Other prerequisites**

--

## Contents

Students will be provided with essential geological, geochemical and geophysical methods for the discovery of new mineral deposits, integrated in a global context. Thus, the main focus will be on the practical application and usability in diverse stages of exploration.

## Intended learning outcomes

Students acquire state-of-the-art basics of common, modern methods for exploration and evaluation of new mineral deposits. The basics range from consolidated understanding of structural geological contexts and geochemical hints up to basically geophysical methods for an improved characterisation and limitation of economically relevant mineral deposits.

## Courses

(V (1) + Ü (1)

Module taught in: German and/or English

**Method of assessment**

(a) term paper (10 to 15 pages) or (b) oral examination of one candidate each or oral examination in groups (approx. 30 minutes per candidate each)

Assessment offered: Once a year, summer semester

Language of assessment: German and/or English

## Allocation of places

25 places. Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

## Additional information
