### Contents

In generic manner, the module provides students with an overview of history and topography of a geographical unit, taking into account the historico-cultural aspects, in the Greek-Roman settlement area. Furthermore, the module covers central places, specific memorial groups and artefacts in their regional and cultural context. Particular attention will be paid to the classification of covered regions into the environment of the Mediterranean cultural space.

### Intended learning outcomes

Students are able to classify archaeological remains topographically and to apply geographical skills that they have already acquired for their interpretations. Moreover, they develop a critical understanding of current methods and research discussions and are familiar with the respective specialised literature.
