<b>Contents</b>		
Deepening the knowledge acquired in AMP 6: Role and function of music in intermedial contexts. The specific subject matters touch on optional areas of literature, film, theatre and art history, aspects of media education or also media theory, media aesthetics and communication.		
<b>Intended learning outcomes</b>		
The students deepen the knowledge acquired in AMP 6 and examine questions of mediality in music-educational discourse: They have the ability to describe music in intermedial contexts using examples. They are able to analyse the mutual relationship between music and literature, film, stage and image using examples. The students recognise the fundamental importance of interdisciplinary approaches for researching the interfaces of music and other media and also have basic knowledge of the media-related state of music in an exemplary subject area. They are able to discuss media-theoretical methods or individual strategies in terms of their aims and argumentation and to apply them to examples.
