<b>Contents</b>		
<p>In this module, the history and methods of music theory in European music history since the Middle Ages are studied. The focus is on music theory tracts and compositional teaching materials as well as the analysis of the extent to which such musical craftsmanship has been expressed* in traditional works. Using significant examples, music theoretical description systems (such as counterpoint, basso continuo, harmonics) and music analytical methods (such as reductive, structural or form theoretical approaches) will be taught, reflected and tested.</p>		
<b>Intended learning outcomes</b>		
<p>The student has well-founded exemplary knowledge of the history of music theory, its sources and methods. He/she is able to reflect and describe these in their historical conditionality. He/she is able to apply the learnt craft independently, these sophisticatedly and critically in the analysis of music and to evaluate it for an interpretation.</p>
