| <p>In this module, the regional conditions and characteristics of music from different cultures are studied. Specific regional music traditions are taken into account, for example from the perspective of their stylistic characteristics, their transmission modalities or those characteristics which result from the spatial mobility of musicians. Empirical, source-critical or text-critical methods as well as comparative analyses are applied, for example with regard to regional transfer processes, characteristics of musical forms or regional traditions of music practice.</p> | | |
| Intended learning outcomes | | |
| <p>The student has an idea of the geographical spectrum and the regionally differentiated diversity of global music cultures. He/she is able to develop processes and phenomena shaped by regional music within the framework of a clearly defined task and to classify them in cultural or intercultural contexts.</p> | | |
