Contents		
<p>In this module, the medial forms of the transmission of music are studied. Oral and written transmission as well as electronic and sound storage with their respective characteristics and problems will be taken into account. The concept and matter of source, writing and text as well as the dimensions of mechanical and electrical production, archiving and reproduction of music are critically reflected.</p>		
Intended learning outcomes		
<p>The student has knowledge of the different forms of music transmission. When looking at specific sources, he/she is able to recognise the academic issues resulting from them. Against this background, the student is able to methodically and appropriately deal with the specific problems and to determine the relationship of the carrier of the tradition and the object of the tradition.</p>
