Contents		
The module provides students with a detailed insight into selected material groups. Additionally, they will become familiar with different scientific methods concerning materiality-based analysis of museum objects.		
Intended learning outcomes		
Students are familiar with the history, characteristics and dimensions of significance for generic material groups and thus, skilled for a proper dealing with as well as precise determination of respective museum objects. Moreover, students acquire knowledge of the most important scientific materiality-based analysis methods. Next to the application possibilities and symbolic potential, this also comprises methodological restrictions.
