<b>Contents</b>		
This module provides students with consolidated knowledge of collecting, which is the primary task of each museum. Additionally, the module provides an overview of the phenomenon "collection" in the private as well as in the museum area. Students will become familiar with the different motives, strategies and principles that are subject to this phenomenon.		
<b>Intended learning outcomes</b>		
Students are able to classify, evaluate and reflect the museum as well as private collections in a cultural and scientific way. This is important for the future profession as on this basis substantiated decisions will be made, such as whether a private collection should be added to a museum's collection or not. Moreover, students are familiar with the possible consequences and individual working steps that result from such an addition and know how a collection has to be preserved and managed.
