Basic introduction to the history of ancient Western Asia (= countries of today's Near and Middle East) based on archaeological sources. Module C of the six-part lecture cycle (entry possible at any time) introduces to the Late Bronze Age period. The focus lies on processes of change in the coexistence of social groups. These become archaeologically tangible in building and settlement patterns, in burial practices, in material and visual culture as well as through scientific analyses. The geographical scope covered ranges from the eastern Mediterranean coast to Central Asia and from Anatolia to the south of the Arabian Peninsula. The lecture provides an overview of the chronological structure, regional and supra-regional developments, and specific phenomena according to the archaeological record and the current state of research. The lecture will present important sites, monuments and researchers, and will refer students to research literature on specific periods and problems.		
Intended learning outcomes		
The module provides facts and contexts, i.e. research-based knowledge on the early history of Western Asia based on archaeological sources. In addition, students gain insights into the archaeological and intellectual processes that led to the current state of research.
