Contents		
In this module we discuss selected aspects of planning classes and of the development of school sports and establish connections to the basic topics of subject didactics. We use examples from various movement fields to transfer this knowledge to specific exemplary classes. We plan, conduct and evaluate physical education classes in view of the didactic problem of choosing subjects for physical education.		
Intended learning outcomes		
The students acquire professional skills in reviewing, classifying and evaluating the methodical principles of physical education in a conceptual manner. They know the effects of subject-didactic concepts on teaching practice and are able to use these concepts in practice to plan physical education classes and conceptualise school sports programmes. At the same time, they are able to be critical of such planning and evaluating guidelines.
