Contents		
In the seminar "Sport Didactics" we discuss selected aspects of planning classes and of the development of school sports and establish connections to the basic topics of subject didactics. We use examples from various movement fields to transfer this theoretical knowledge to exemplary classes. We plan, conduct and evaluate physical education classes in view of the didactic problem of choosing subjects for physical education.		
Intended learning outcomes		
The students acquire essential professional skills in reviewing, classifying and evaluating the methodical principles of physical education in a conceptual manner. They become acquainted with the effects of subject-didactic concepts on teaching practice and learn to use these concepts in practice to plan physical education classes and conceptualise school sports programmes. At the same time, they learn to be critical of such planning and evaluating guidelines.
