Contents		
In this module we discuss central principles of sports biology and training sciences and establish connections to sports practice. In this way, the students acquire scientific knowledge about movement and sports. The seminars elaborate on the topics from the lecture and discuss consequences and implementation possibilities whilst taking into account aspects of movement science.		
Intended learning outcomes		
The students acquire essential professional skills in sports biology and training sciences and are able to establish connections to sports practice. They acquire differentiated methodological competencies by examining and comparing central terms, concepts and methods in view of various movement fields, training goals and target groups.
