Contents

In this module we discuss and evaluate basic questions and issues of physical education games and didactics. We use examples from target kicking games to apply these principles. The students test their knowledge about sport didactics in practice in accordance with differentiated guidelines regarding performance and teaching.

Intended learning outcomes

The students use examples from target kicking games to acquire essential professional skills in the area of teaching physical education games. They know the principles of various didactic approaches to physical education games. They examine the basics of a selected approach that is suitable for the requirements of an exemplary movement field. In doing so, they become able to transfer their knowledge as well as methods of game analysis and methods of teaching physical education games to other physical education games or other game topics. As a result, the students become acquainted with a variety of didactic approaches to teaching sports which they can apply and evaluate in practice.
