Contents		
<p>In this course we discuss, evaluate and try out basic and advanced teaching/learning approaches to sports and movement fields for teams and individuals. We use the example of exercising in water to evaluate the basic approaches and we further survey a net/wall game as well as movement patterns in gymnastics and dance. The students test their knowledge about sport didactics in practice in accordance with differentiated guidelines regarding performance and teaching.</p>		
Intended learning outcomes		
<p>The students acquire basic and advanced knowledge and competencies in teaching team and individual sports. They have basic teaching/learning competencies in the area of exercising in water. Furthermore, they develop advanced didactic and motor competencies in the net game volleyball and in creating movement in the field of gymnastics and dance. They are able to transfer these competencies to other teaching/learning situations of individual sports, team sports and movement fields.</p>
