<b>Contents</b>		
<p>In this course we discuss the basics of functional anatomy as well as the musculoskeletal system and its overload and injury mechanisms. Furthermore, we survey possibilities and measures for individuals and groups to promote fitness and health. One lecture focuses on the principles of functional anatomy and sports traumatology and two other seminars teach the students to apply these principles to concepts and methods of individual fitness and health promotion for individuals and groups.</p>		
<b>Intended learning outcomes</b>		
<p>The students have key professional skills in functional anatomy and sports traumatology. They are able to utilise these skills in a manner that is appropriate to the situation and audience in order to plan and conduct health-oriented measures for promoting fitness in individuals and groups.</p>
