### Contents
Work placements in pedagogical fields in order to acquire and advance professional knowledge. The process of continuing learning on one's own authority is critically evaluated in the subsequent course.

### Intended learning outcomes
The students acquire professional knowledge and continue learning on their own authority. In doing so, personal and social competencies are combined with the acquisition of professional knowledge. The students also acquire basic insights into and knowledge of institutions/organisations. The practical experience also serves as a possibility for the students to evaluate their own professional self-perception and ethics. In the subsequent seminar, the students learn to critically evaluate their self-perception in view of the relations between theory and practice in confrontation with justified foreign interpretations.
