| In this module, the contents of the degree courses are deepened and references to neighboring sciences are made, which expand and deepen the skills already acquired, e.g. media communication, business informatics, interaction design, sociology of technology, psychology, computer science, museology, digital humanities, geography, etc.                                                                                                                                                                                                           |                   |                                      |
| Intended learning outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                   |                                      |
| After participating in this module, students will be able to name and explain typical problems and methods in their own subject as well as in related fields of science and application. They develop methodological competence, communicative competence, cooperation skills and the ability to deal with conflicts in interdisciplinary cooperation.                                                                                                                                                                                                    |                   |                                      |
