UNIVERSITÄT WÜRZBURG
Julius-Maximilians-

Module title	Abbreviation
Experience as a tester or subject in experiments	06-HCI-B-VPS-242-m01

Module coordinator	Module offered by
chairperson of examination committee of the Bachelor's degree programme Human-Computer Interaction	Institute of Human Computer Media

ECTS	Method of grading	Only after succ. compl. of module(s)
1	(not) successfully completed	--

Duration	Module level	Other prerequisites
1 semester	undergraduate	--

Contents

Empirical studies and controlled experiments are the central methods of scientific procedure. Typically, students learn to design and execute experiments from the perspective of the person conducting the experiment. In this module, students switch sides and participate in experiments, not as leaders, but as subjects. Detailed information on the distribution of subject hours among the various work areas of the Institute Human-Computer Media can be found on the degree program's website.

Intended learning outcomes

After participating in the module courses, students will be able to recognize how subjects perceive empirical studies. They can deduce which positive and negative aspects an empirical study can have from the perspective of a test subject.

Courses (type, number of weekly contact hours, language — if other than German)

P (0)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Acting as a participant in experiments (30 hours)

Allocation of places
