Contents
We discuss early theoretical concepts and their development or modification (e.g. Georgens/Deinhardt) in the context of current theories (e.g. WHO, inclusion) as well as their effects on scientific research. We examine society's attitude towards disabilities and the development of individual and social identity in the context of disabilities (possibly in the context of specific types of disability). Furthermore, we talk about possibilities of social empathy and ways of improvement as well as aspects of attitude change.

Intended learning outcomes
Advanced knowledge of specific theoretical concepts. Reflection competence in the context of disabilities and society. Increasing problem awareness in the context of disabilities (possibly with a specific focus).
