--- | ---
Basics of orthopaedics | 06-K-Me1-092-m01

Module coordinator
holder of the Chair of Special Education II

ECTS | Method of grading | Only after succ. compl. of module(s)
--- | --- | ---
6 | (not) successfully completed | --

Duration | Module level | Other prerequisites
--- | --- | ---
1 semester | undergraduate | Admission prerequisite to assessment: regular attendance of seminar/seminars (minimum 85% of sessions offered).

Contents
This module explains the medical principles, development, diagnostics and therapeutic possibilities of the main physical impairments as well as current research results. Furthermore, it illuminates the possible effects of these impairments on different developmental areas.

Intended learning outcomes
The students have basic medical knowledge of various physical impairments as well as their diagnostics and therapy and are able to describe possible effects on different developmental areas. Based on this knowledge, they are able to develop first approaches to support. Furthermore, they have gained a comprehensive overview of the main physical impairments and their possible effects on child development and have therefore acquired a firm basis for further theoretical and practical examinations in FSkmE (special-needs schools focusing on physical and motor development).

Courses
S + S (no information on SWS (weekly contact hours) and course language available)

Method of assessment
a) written examination (approx. 40 minutes) or b) presentation (approx. 20 minutes) with written elaboration (approx. 10 pages) or c) presentation (20 to 40 minutes) or d) presentation (approx. 20 minutes) and written examination (approx. 20 minutes) or e) oral examination of one candidate each (approx. 15 minutes) or f) oral examination in groups (groups of 4, approx. 15 per candidate) or g) term paper (10 to 15 pages)
