Basics of orthopaedics		o6-K-Me1-152-m01
<b>Module coordinator</b>		<b>Module offered by</b>
holder of the Chair of Special Education II		Chair of Special Education in the Context of Physical and Complex Disabilities
<b>ECTS</b>	<b>Method of grading</b>	<b>Only after succ. compl. of module(s)</b>
6	numerical grade	--
<b>Duration</b>	<b>Module level</b>	<b>Other prerequisites</b>
1 semester	undergraduate	--
<b>Contents</b>		
This module explains the medical principles, development, diagnostics and therapeutic possibilities of the main physical impairments as well as current research results. Furthermore, it illuminates the possible effects of these impairments on different developmental areas.		
<b>Intended learning outcomes</b>		
The students have basic medical knowledge of various physical impairments as well as their diagnostics and therapy and are able to describe possible effects on different developmental areas. Based on this knowledge, they are able to develop first approaches to support. Furthermore, they have gained a comprehensive overview of the main physical impairments and their possible effects on child development and have therefore acquired a firm basis for further theoretical and practical examinations in FSkmE (special-needs schools focusing on physical and motor development).		
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)		
S (2) + S (2)		
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) written examination (approx. 60 minutes) or b) presentation (approx. 45 minutes) or c) presentation (approx. 30 minutes) with written elaboration (approx. 8 pages) or d) oral examination of one candidate each (approx. 30 minutes) or e) term paper (approx. 10 pages) or f) portfolio (approx. 15 pages)		
<b>Allocation of places</b>
