Contents		
Usability guidelines often sound logical, but their implementation is often more difficult than expected. In this module, students learn basic guidelines for the design of e.g. texts, graphics and forms as well as special guidelines from different application domains e.g. web, natural user interfaces and language interaction and apply them prototypically.		
Intended learning outcomes		
After participating in this module, students will be able to explain basic rules of good user interface design using examples, recognize typical usage problems, and apply rules to avoid them.
