

Module title		Abbreviation
Experience as a tester or subject in experiments		o6-MCS-Meth-2-152-m01
Module coordinator		Module offered by
holder of the Chair of Psychological Ergonomics		Institute of Human Computer Media
ECTS	Method of grading	Only after succ. compl. of module(s)
1	(not) successfully completed	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Trials and controlled experiments are central methods for empirical evaluations. Typically, students learn how to design and execute well-defined experiments as the controlling instances. In this module students have to switch sides and take part in such trials and experiments not as the controller, but as subjects.		
Intended learning outcomes		
After the course, the participants will have a good understanding of how test subjects perceive empirical trials. They will become more sensitive on does and don'ts of such tests as seen from the subjects' point of view.		
Courses (type, number of weekly contact hours, language – if other than German)		
P (o)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
Acting as a participant in experiments (30 hours)		
Allocation of places		
--		
Additional information		
--		
Referred to in LPO I (examination regulations for teaching-degree programmes)
