<b>Contents</b>		
<p>This module provides an insight in the current state of research in learning and instruction using new media. Students will deal with psychological theories and empirical evidence from e-learning research. They will focus on innovative learning arrangements, e. g. pedagogical agents, virtual tutors, personalised learning environments or augmented reality. Topics will be critically discussed on the basis of current research articles, reviews and meta-analyses.</p>		
<b>Intended learning outcomes</b>		
<p>Students learn about the current state of eLearning research. They are able to understand research articles, reflect on and question their results and outline practical implications. Students are thus able to develop their own research questions in instructional psychology and to evaluate the quality of concrete eLearning measures from a researcher's point of view.</p>
