<p>Media psychology deals with human experiences and behaviour while interacting with media. It develops theories and tests them in empirical studies. The first module component aims to teach deeper fundamental knowledge about the subject of media psychology (individual media and digital media) as well as its theories, findings and methods. Thematic focuses:</p> <p>a) the subject itself, theories and findings of media psychology: more in-depth insights b) research fields and current problems in media psychology: more in-depth insights c) methods in media psychology: more in-depth insights.</p>		
Intended learning outcomes		
Students should obtain a deeper insight into selected concepts. They should be familiar with different subject-specific questions and should be able to apply a psychological perspective to these.
