<b>Contents</b>		
Students will choose one out of the four core areas of the degree programme (media psychology, communication science, computer science in media, instructional psychology). In the selected area, the students will develop, in small groups, their own research project. This project provides them with an opportunity to apply their subject-specific knowledge as well as their skills in methodology and statistics. Over the course of this module, students will go through all stages of a research project.		
<b>Intended learning outcomes</b>		
Students apply their acquired knowledge (content-related, methodological, statistical) to research practice by developing their own empirical research project. In doing so, they experience every single step of the research process - from the idea through to the documentation of the results.
