| 1 semester   | undergraduate            | --  |
| <b>Contents</b>  |                          |   |
| This module will provide deeper knowledge about topics (concepts, theories, empirical analysis and practice) in instructional psychology. In small groups, students will do empirical research in instructional psychology.  |                          |   |
| <b>Intended learning outcomes</b>  |                          |   |
| Students have obtained subject-specific expertise and social skills that are useful in the workplace. Thus, students do not only have subject-specific knowledge about central topics, theories and methods of instructional psychology but are also able to apply this knowledge in practice and use it as a basis for the Master's programme. In addition, students have gained theoretical, empirical and application-oriented skills that will be useful in their future jobs (e. g. the design of learning environments and the evaluation of eLearning). |                          |   |
| <b>Courses</b> (type, number of weekly contact hours, language – if other than German)   |                          |   |
