Module coordinator		Module offered by
holder of the Chair of Media Psychology		Institute of Human Computer Media
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
<p>This module aims to provide deeper knowledge about the topics (concepts, theories, empirical analysis and practice) in media communication. Students will choose one out of the four core areas of the degree programme (i. e. media psychology, communication science, computer science in media, instructional psychology) and will work in small groups on topic-related projects.</p>		
Intended learning outcomes		
<p>Students should obtain subject-specific expertise and social skills that are an asset in the workplace. Thus, students do not only have profound subject-specific knowledge in central topics, theories and methods of media communication but are also able to apply this knowledge in practice and use it as a basis for the Master's programme. In addition, students have gained theoretical, empirical and application-oriented skills which are of an asset in job-relevant situations (e. g. in the design of media formats and in central questions regarding the evaluation of media products).</p>		
Courses (type, number of weekly contact hours, language — if other than German)		
S (4)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) written examination (approx. 100 minutes) or b) oral examination (approx. 20 minutes) or c) report (approx. 15 pages) Language of assessment: German and/or English
